*Überlieferung: Erfurt Bibliothek des Domarchivs. Hs. Hist. 6.*

Unfortunately the **ANALECTA CARTUSIANA** has been seriously affected by the current economic crisis. From 1970-1980 we had up to 200 subscriptions to the series, but from 1980 onwards the subscriptions diminished constantly owing to reductions in the dotation of many university libraries. Today 139 copies are distributed immediately on publication and a further 5-20 copies are sold in the following year. For the Monasticon Cartusense we have 31 extra orders, and for the Acts of the Carthusian General Chapter 18. From the 139 a number are, however, not paid for: the four legal deposit copies, exchange copies, review copies, copies for authors and collaborators, and copies for those charterhouses which make no contribution to the costs, and a few savants.

Dom André Poisson and his successors have supported the **ANALECTA 1971-2014** with an annual contribution, the Austrian Ministry of Research at Vienna 1981-2000 donated annually 2000 Euros and 2001-2011 3000 Euros annually, **when the support for all publications was abruptly terminated owing to the economic situation.** On five occasions the government of Lower Austria contributed 1500 Euros for the publication of the proceedings of congresses held in Lower Austria. Thus the present Prior of the Grande Chartreuse and the Priors of Miraflores, La Valsainte et Pleterje alone continue to grant a considerable aid for the printing costs.

The University of Salzburg, which has carried the major part of the postal expenses since 1971 found it impossible to continue this service after the 31 December 2012 owing to serious economic pressures. I am thus obliged to ask non-payers for a minimum of 100 Euros to defray the cost of sending out the at least 15 volumes envisaged for 2016. Those who did not contribute for 2014 and/or 2015 are kindly asked to do so. If one can also make a contribution to the printing costs I would be duly grateful.
